Invest with Equipment/Supplies

Donate with Equipment/Supplies

User will have to be logged in to view these pages

4.) When an Investor clicks on the "Invest with Equipment/Supplies" Button, it will go to the business equipment/tools/resources/supplies investment page. Here it will list out the Entries entered by the Business Owner with buttons to Invest.(per entry)

Invest with:	Equipment	Amount	Value	Details	
	Computers	30	400000	Min Specs: i5, 8 GB RAM, 250 GB	Invest
	20 Litre Tanks	2	50000	Plastic, portable	Invest

- On click of Entry e.g. Computers, the button for that option is set to inactive on the page so no one else can invest in the same option twice.
- The Business Owner will receive a notification and start communicating with the equipment investor on necessary details and of delivery of the equipment.
- If the talks break down, the business owner or equipment investor can cancel the process and this will activate that Equipment button on the Business equipment/tools/resources/supplies investment page. e.g. the "Invest" in Computer supplies button will be activated again as the process didn't end successfully.

5.) When an Jitume site visitor clicks on the "Donate Business Equipment/Supplies" Button, it will go to the business equipment/tools/resources/supplies donations page. Here it will list out the Entries entered by the Business Owner with buttons to Donate. (per entry)

Donate with:	Equipment	Amount	Value	Details	
	Computers	30	400000	Min Specs: i5, 8 GB RAM, 250 GB	Donate
	20 Litre Tanks	2	50000	Plastic, portable	Donate

- On click of Donate e.g. For Computer supplies, the Donator is asked what amount do they want to donate e.g. The business owner needs 10 computers for their cyber cafe, but the donator can only give 3 computers.
- If the donator is giving the full amount of supplies (e.g. all the 10 computers) the option is set to inactive on the page so no one else can Donate the same option twice. If not, the button will always stay active until the full amount is reached and updated per donation (e.g. if 3 computers are donated, then 7 remain, so it will show 7 computers in the amount required)
- After confirming the amount and clicking next, the Business Owner will receive a notification and start communicating with the equipment donator on necessary details and of delivery of the equipment.
- If the talks break down, the business owner or equipment donator can cancel the process and this will reset the value of amount donated and reactivate that Donate button on the Business equipment/tools/resources/supplies donation page if it was a donation of the full equipment amount. e.g. the "Donate" Computer supplies button will be activated again as the process didn't end successfully.

6.) For each equipment invested/donated, it will less the investment ask. (e.g. The investor had requested an investment of 1 million kshs and someone invests with 10 computers worth kshs400k, then the business owner money investment ask is taken to kshs600k)

Sample Scenario

- Wanjiku has a cyber cafe and requires an investment of 1M Kshs to scale and utilize the office space she currently has. Wanjiku is offering 50% in shares of her company for 1M Kshs.
- Out of that 1M Kshs, 400k of it is going into the investment of 10 computers.
- So for the investment of 10 computers, the share % will be $0.4 \times 50 = 20\%$ shares in the company for providing the computers.
